

Italiana Parquet

TECHNICAL DATA SHEET _ ITALIANA PARQUET _ MAINTENANCE BIO SOAP

Gentle cleaner for wooden floors with Wax Effect, UV Varnish Oiled finish and Natural oil finish. Suitable for frequent use.

With antistatic action to counteract dust attraction and accumulation, helping keep floors clean for longer. Leaves a pleasant appearance and a fresh, clean feel.

Made with fully biodegradable plant-based surfactants (in accordance with EC Regulation 648/2004).

Minimizes environmental impact and helps prevent allergy and contact sensitivity issues (except in individuals allergic to specific ingredients).

Useful information

The deeper parts of the wood, such as brushed or saw-cut surfaces, may show slight darkening over time due to the accumulation of impurities. Proper floor maintenance significantly reduces this effect.

Never use water alone to clean floors: besides being ineffective for proper cleaning, the mineral residues it contains may settle on the surface and alter its reflectance.

Instructions for use

Remove solid dirt from the surface using a vacuum cleaner equipped with a brush suitable for parquet; this is an essential step to eliminate solid particles that may be abrasive to the surface.

Shake the Italiana Parquet **Bio Soap** container well and dilute 2 caps in a bucket containing 5 liters of water.

Dip a non-abrasive microfiber cloth (suitable for delicate surfaces) into the solution. Even when used on textured surfaces (e.g., "Mild Planed" or "Sawn"), it should not leave fiber residues. Wring it thoroughly and wipe the floor using a mop.

To prevent the cloth from becoming dirty and spreading dirt back onto the floor, rinse it in clean water after each use (for example, using a dual-bucket system or rinsing under running water). No final rinse is required.

1 liter of product is sufficient for approximately 8 cleaning cycles on a 100 m² surface.

In case of very stubborn dirt, cleaning may be carried out using a double concentration of Italiana Parquet Bio Soap. It is recommended never to exceed this concentration.

Once opened, the product should be used within 12 months. The bottle is largely made from recycled material and is fully recyclable in plastic waste collection.

At the same concentrations, **Bio Soap** is equally effective not only on parquet but also on other hard household surfaces, such as ceramic tiles, porcelain stoneware, and terracotta. It is always advisable to test the product beforehand on a small hidden area.

The product is not classified as hazardous. However, it is recommended to keep it out of reach of children.

Avoid contact with eyes. In case of contact with eyes, rinse immediately and thoroughly with water.

The information provided in this technical data sheet is based on the Company's research and direct experience and is generally valid, given the impossibility of foreseeing all environmental and application variables.
